

SPONSORS

If your company or organization has an interest in masonry, we can offer you a variety of opportunities for sponsorships or support, such as:

- Product Displays
- Conference Events (dinner, excursion etc.)
- Conference Material

Please contact us for further details.

If you would like to present your company or organization and its products or services, exhibit spaces will be available near the conference rooms.

University of Minnesota Pillsbury Hall

University of Minnesota Electrical Engineering/Computer Science Building

ACTIVITIES

Opening Reception, Brick & Mortar Mixer, Banquet, Tours, Family Events

ANNOUNCEMENTS & CALL FOR ABSTRACTS

eleventh
NAMC
minneapolis, mn usa

HOSTED BY

VENUE

The 11th North American Masonry Conference (NAMC) will be held at the Minneapolis campus of the University of Minnesota. It is two miles from downtown Minneapolis, which offers outstanding restaurants, entertainment & shopping and is easily accessible from the Minneapolis-St. Paul International Airport (MSP).

The mighty Mississippi River winds through the Twin Cities home of the University of Minnesota. Founded in 1851, the University has a presence throughout the state with five campuses and numerous research and outreach centers.

Aerial view of campus and downtown Minneapolis

Built around the Mississippi, Minnesota, and St. Croix rivers, the area is nicknamed “The Twin Cities” for its two largest cities, Minneapolis, the larger, and St. Paul, the state capital. The two cities are independent municipalities with defined borders and are quite distinct from each other. Minneapolis has more broad boulevards, easily navigable grid layout, and modern downtown architecture. Saint Paul has narrower streets laid out much more irregularly, with a vast collection of well preserved late-Victorian architecture.

CALL FOR PAPERS

SUGGESTED TOPICS

- Multi-hazard design
- Self-consolidating grout
- Autoclaved aerated concrete masonry
- Prestressed masonry
- Sustainable materials & “green” design and construction
- Evaluation of building envelope performance
- Ecological/environmental quality measuring methods
- Electronic tools for masonry design
- Case studies/Lessons learned
- Masonry constructability
- Workforce development
- Innovative products and systems
- Preservation and restoration

Abstracts on other masonry topics will be considered.

ABSTRACTS

Authors are invited to submit 150 to 300-word abstracts related to the topics listed. Guidelines for the format of the abstract and requirements for submission of the final paper are available on the conference website:

www.masonrysociety.org/NAMC/

SUBMISSIONS

All submissions should be sent to:

NAMC@umn.edu

CONFERENCE

DATES

Abstracts due	May 10, 2010
Notification of abstract acceptance	June 30, 2010
Submission of full paper	Aug. 31, 2010
Paper reviews returned	Nov. 15, 2010
Final paper due	Jan. 18, 2011

Univ. of Minnesota Coffman Memorial Union

OBJECTIVES

The North American Masonry Conference (NAMC) is a forum for engineers, architects, contractors and others interested in masonry for the exchange of scientific, engineering, architectural, construction, evaluation, and repair information on masonry. This conference seeks to bring together worldwide expertise to address current issues related to masonry in seismic regions and green technology applications in masonry. Papers on research and practical applications to create opportunities for more effective and expanded use of masonry are solicited.
